

Dodawanie i odejmowanie z kształtami Numicon.

$$\begin{array}{r} 2 \\ + \\ 3 \\ = \\ 5 \end{array}$$

The image shows a vertical addition problem using Numicon shapes. On the left, the numbers 2, +, 3, =, and 5 are arranged vertically. To the right of each number is a corresponding Numicon shape: a blue vertical bar with two white circles for the number 2; a plus sign; a yellow L-shaped bar with three white circles for the number 3; an equals sign; and a red L-shaped bar with five white circles for the number 5.

$$\begin{array}{r} 6 \\ - 2 \\ = 4 \end{array}$$

$$\begin{array}{r} 5 \\ + \\ 5 \\ = \\ 10 \end{array}$$

$$\begin{array}{r} 10 \\ - \\ 5 \\ = \\ 5 \end{array}$$
